▼ Experience

August, 2019 – Now

Open Source Contributor • HANGAR

- I submitted a PR to implement the Theme Switcher and Light Theme for the User Interface.

October, 2018 – Now

Software Developer • EK-BRANDCONSULT

- I built a Flight Search and Booking Engine with Amadeus API.
- I fixed all bugs on the company's marketing application (Syde Hassle) to reduce the estimated time to market.
- I develop and deploy both dynamic and static websites for Clients in the Real Estate, Travel and Tours, Hospital and Ecommerce industries.
- I trained interns who were new to web development to build websites within 2 months and coordinate with the remote developer to execute projects.
- I built and maintain the E-commerce platform on the company's clients' portal.
- I reduced the time used to deploy WordPress sites to DigitalOcean server used by the company by 90% using an automation script.
- I advise the sales team during brainstorming sessions on how best to sell the products and services we provide.
- I occasionally interact with new clients to understand their need to be able to provide value for them.
- I manage the servers, serve as webmaster and actively perform search engine optimizations for clients.

January 2015 – Now

Freelance and Personal Projects

- I write technical articles on dev.to
- I created my blog with [Gatsby and Storyblok](#). It is an improved replication of what I had built with [NuxtJs and Storyblok](#).
- I promoted the online presence of small companies to help market their products and services by developing and launching websites for them. [Multiview Designs](#).
- I set up custom email for the clients with Zoho mail.
- I worked on personal projects: [Peg Dashboard](#) , [Quickmed](#).
