▼ Experience

August, 2019 – Now

Open Source Contributor • HANGAR

- o I submitted a PR to implement the Theme Switcher and Light Theme for the User Interface.
- o My focus on the Semantic UI version for Vue is the documentation. I've submitted a PR for the Sidebar component documentation.

October, 2018 – Now

Software Developer • EK-BRANDCONSULT

- o I built a Flight Search and Booking Engine with Amadeus API.
- o I fixed all bugs on the company's marketing application (Syde Hassle) to reduce the estimated time to market.
- o I develop and deploy both dynamic and static websites for Clients in the Real Estate, Travel and Tours, Hospital and Ecommerce industries.
- o I trained interns who were new to web development to build websites within 2 months and coordinate with the remote developer to execute projects.
- o I built and maintain the E-commerce platform on the company's clients' portal.
- o I reduced the time used to deploy WordPress sites to DigitalOcean server used by the company by 90% using an automation script.

January 2015 – Now

Freelance and Personal Projects

- I created my <u>blog</u> with Gatsby and Storyblok. It is an improved replication of what I had built with <u>NuxtJs and Storyblok.</u> I deployed both of them with Netlify.
- I promoted the online presence of small companies to help market their products and services by developing and launching websites for them. <u>Multivew Designs.</u>
- I set up custom email for the clients with Zoho mail.
- I worked on personal projects: <u>Peg Dashboard ,Soteria, Quickmed,</u>

▼ Education
